

**Market Commentary: The VN-INDEX kept its momentum to increase for the fourth consecutive day.**

The VN-INDEX edged up 3.1pts to close at 1,334.6pts in the final session before the National Independence Day's holiday - September 2nd. The cautious sentiment immediately covered the market, pulling the index to touch its intraday low of 1,328.9pts (-0.2%) right after the opening bell and moving in a narrow range around the reference level for the whole morning session. Consumer large caps performed badly in today's session, led by MSN (-1.3%), MWG (-0.7%), PNJ (-0.8%), and SAB (-0.9%). Other large caps also had poor achievements, including TCB (-0.4%), GAS (-0.9%), PDR (-2.5%), and HPG (-0.2%). In the afternoon session, the market kept its morning trend and continued fluctuating around the reference level until close. However, it maintained to stay in green territory most of the time, with only sometimes dipping to red color but bouncing back right away. GVR is today's top driver by increasing 3.5% and alone adding 1.4pts to the index advance. Other large caps also join the rally, including VHM (+0.6%), CTG (+0.8%), PLX (+2.2%), POW (+5.1%) and VNM (+0.6%). At the end of the session, the VN-INDEX inched up 0.2% to close at 1,334.6pts. The HNX-INDEX also increased 0.2% to close at 343.4pts.

**Energy (+1.9%), Materials (+1.3%), and Industrials (+0.8%) rose, while Health Care (-1.9%), Consumer Staples (-0.2%), and Consumer Discretionary (-0.1%) lost ground today.** Top index movers included GVR (+3.5%), VHM (+0.6%), VNM (+0.8%), PLX (+2.2%), and POW (+5.1%). Top index laggards consisted of MSN (-1.3%), GAS (-0.9%), PDR (-2.5%), SAB (-0.9%), and TCB (-0.4%).

## Market News

### Oil ticks higher as traders count down final hours to OPEC+ meeting

Oil rose as September opened, with traders counting down the hours until an OPEC+ meeting that should result in a further rise in output. West Texas Intermediate was up 0.9% after losing more than 7% in August, the biggest monthly decline this year. The Organization of Petroleum Exporting Countries and its allies including Russia are expected to ratify a plan to add 400,000 barrels a day in October, wagering that the market can absorb the extra flows as demand recovers from the coronavirus pandemic. *(Bloomberg)*

### Feed-in tariffs in solar energy to be scrapped, says officials

The country's feed-in tariff mechanism for rooftop solar energy projects, a policy tool designed to stimulate investment, is set to be abolished, according to officials at a workshop on Monday. The purchase price for rooftop solar electricity is 8.38 cents/kWh, according to a 2020 government decision, which expired late that year. So far this year, solar power investors have been waiting for a new pricing policy for this source of energy, including rooftop solar power. Still, the Ministry of Industry and Trade and the national electricity buyer Vietnam Electricity Group (EVN) have not given any follow-up guidance on procedures for the grid connection process, power purchase agreements and the payment for rooftop solar power. The new policy will get rid of the feed-in pricing policy, which has been adopted for two decades, according to the official. Hung revealed the on-site power consumption rate among these projects is expected to account for a staggering 70% to 90% of the total while the rest will be sold to EVN. The move is intended to ease pressure on grid investment, as well as power transmission and distribution, he said. Rooftop solar power projects will no longer be limited to capacity below one megawatt-peak, a solar power measure in the photovoltaic industry to describe a unit's nominal power. Instead, the capacity will be expanded to seven, or even eight megawatt-peak, and it will be connected to the grid systems of less than 35 kilovolts so that EVN will not have to invest in new grids for rooftop solar energy. The new policy would fully exploit the available infrastructure in rooftop solar installations. "Rooftop solar power is a distributed energy resource using the roofs of existing and underway buildings. (This type of power) is able to meet the needs for on-site electricity and make use of the available distribution grid," Hung said. Nguyen Thi Khanh, director of Green ID, said it might not be a good idea to extend feed-in tariffs, and the new policy should be designed to promote the power market since investors are facing a host of legal barriers. If the Government wants to develop this type of energy, the policy should be consistent and long-lasting to win investor confidence and attract their resources. EVN data reveals as of late 2020, Vietnam had over 100,000 rooftop photovoltaic systems which were linked to the national grid system at a total installation capacity of over 9,200 megawatt-peak. So far, the total solar energy output has risen to around 1.15bn megawatt hours, thereby helping supply electricity for the national energy grid. *(Vietnamnet.vn)*

## Notable Corporate Events

**KIDO Group (KDC VN, HOSE) - Treasury share redistribution:** KDC will carry out an online extraordinary General Meeting on September 20. According to the meeting, the board planned to redistribute 22.9 million treasury shares to its existing shareholders with the rate of 10:1. At the present, KIDO held about 51 million treasury shares with total book value of VND1,959bn (~38,400 VND/share) *(Ndh.vn)*

## DISCLAIMER

This report has been prepared by VNDIRECT or one of its affiliates for distribution in Vietnam and overseas. The information herein is believed by VNDIRECT to be reliable and is based on public sources believed to be reliable. With exception of information about VNDIRECT, VNDIRECT makes no representation about the accuracy of such information.

Options, estimates and projection expressed in this report represent the current views of the author at the date of publication only. They do not necessarily reflect the opinions of VNDIRECT and are subject to change without notice. VNDIRECT has no obligation to update, amend or in any way modify this report or otherwise notify a reader thereof in the event that any of the subject matter or opinion, projection or estimate contained within it changes or becomes inaccurate.

The information herein was obtained from various sources and we do not guarantee its accuracy or completeness. Prices and availability of financial instruments are also subject to change without notice.

This published research may be considered by VNDIRECT when buying or selling proprietary positions or positions held by funds under its management. VNDIRECT may trade for its own account as a result of short-term trading suggestions from analysts and may also engage in securities transactions in a manner inconsistent with this report and opinions expressed therein.

Neither the information nor any opinion expressed in this report constitutes an offer, nor an invitation to make an offer, to buy or sell any securities or any option, futures or other derivative instruments in any jurisdiction. Nor should it be construed as an advertisement for any financial instruments.

Officers of VNDIRECT may have a financial interest in securities mentioned in this report or in related instruments. This research report is prepared for general circulation for general information only. It does not have regard to the specific investment objectives, financial situation or particular needs of any person who may receive or read this report.

Investors should note that the prices of securities fluctuate and may rise and fall. Past performance, if any, is no guide to the future. The financial instruments discussed in this report may not be suitable for all investors. Investors must make their own financial decisions based on their independent financial advisors as they believe necessary and based on their particular financial situation and investment objectives.

This report may not be copied, reproduced, published or redistributed by any person for any purpose without the express permission of VNDIRECT in writing. Please cite sources when quoting.
